

NestCore Bathroom Pods

Factory-finished wet areas for repeatable quality and faster fit-out

Finished, Tested, Installation-Ready

NestCore bathroom pods consolidate structure, waterproofing, finishes, sanitary fixtures, plumbing, electrical interfaces, and quality checks into a controlled factory workflow.

Project Benefits

- Consistent finishes across repeated rooms
- Reduced wet trades and coordination on site
- Improved inspection and quality control
- Faster room fit-out and handover
- Cleaner sites with less rework and material waste

Applications

- Hotels and serviced apartments
- Student housing and hostels
- Hospitals and healthcare accommodation
- Worker housing
- Residential and affordable housing programs

Technical Coordination

Pod design is coordinated with structural openings, lifting points, transport constraints, MEP interfaces, site access, installation sequence, jointing, and commissioning requirements.
