

NestCore Global

Industrialized Construction for Faster, Predictable Project Delivery

Industrialized Construction, Made Practical

NestCore helps developers, EPC contractors, institutions, and industrial clients adopt precast, PPVC, modular pods, and onsite factory-driven construction without the burden of owning a permanent factory.

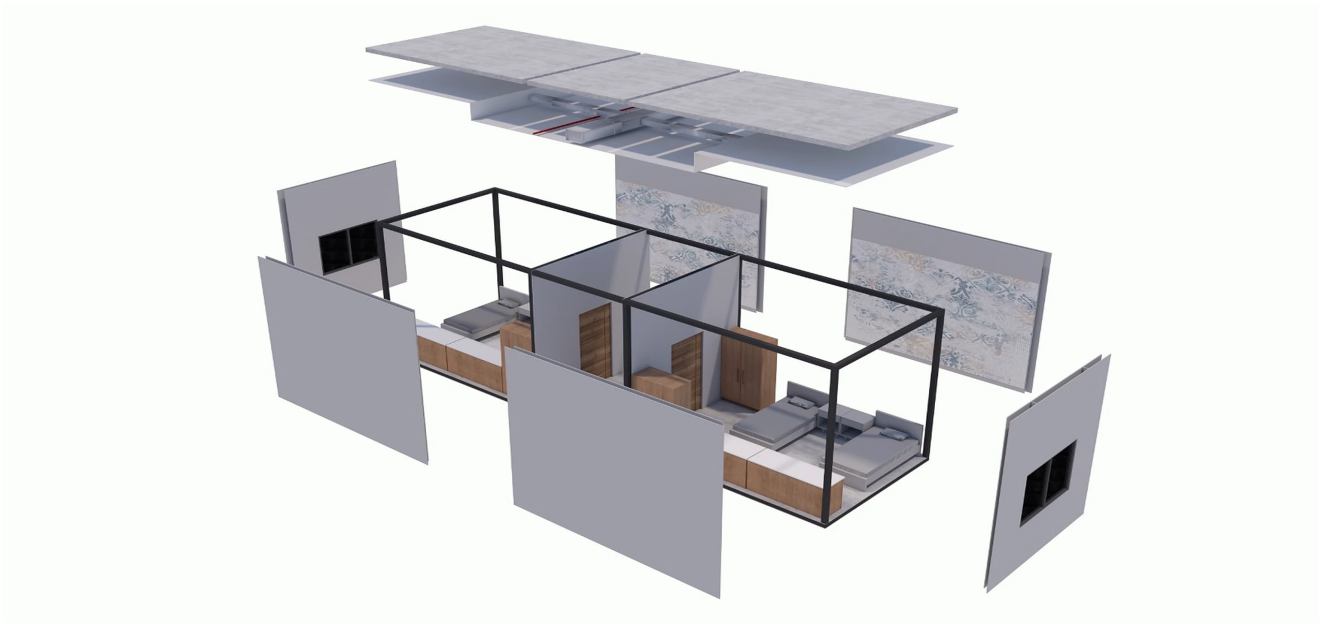

Core Solutions

- Precast construction systems
- PPVC room modules
- Bathroom and kitchen pods
- Office and modular pods
- Onsite precast micro factory / Rent-a-Factory

End-to-End Services

- Feasibility and technology assessment
- Structural design, BIM, connections, and shop drawings
- Factory layout, moulds, equipment, and production workflow
- QA/QC, production management, logistics, and installation support

Why NestCore

- Lower onsite labor dependency
- Parallel factory and site work
- Factory-controlled quality
- Flexible consulting, setup, production, and execution models
- Project-based production capability across India

Execution Ecosystem

NestCore: project strategy, execution leadership, and industrialized construction delivery.

MouldCraft: mould systems, equipment, factory setup, and tooling.

StrucLab: structural design, BIM, connections, and design-for-manufacturing.
